

By switching to the Brevera® breast biopsy system with CorLumina® imaging technology, facilities that conduct around 5 biopsies a week could save

2,600

Minutes Per Year¹

An annual savings of **43.3** hours¹

Based on a biopsy load of 5 stereotactic biopsies per week, 52 weeks per year, and an average time savings of 10 minutes per procedure. Actual savings may vary.¹

10

Minutes Average Savings per patient¹

25%

Less Time Spent Per Procedure¹

54%

Less Waste Produced²

How Do We Do This?

The Brevera system simplifies the biopsy experience for you and your patients by combining multiple steps into one.

Conventional Stereotactic Breast Biopsy Procedure

1. Start biopsy
2. **Take samples**
3. **Remove samples**
4. **Prep samples for imaging**
5. Transport for imaging
6. **Manually image samples**
7. Place marker
8. **Prep samples for pathology**

Brevera Breast Biopsy System Procedure

1. Start biopsy
2. **Take samples, image, verify and prepare samples for pathology**
3. Place marker

Benefits: Improve the Biopsy Experience for Everyone

The Brevera system drives efficiency by combining steps to save time and resources. Teams can save up to **10 minutes average per patient**¹, spend **25% less time on procedures**¹, and produce **54% less waste**² when they switch to the Brevera biopsy system.

Physicians & Technologists

- Confidently verify excised tissue using CorLumina® real-time imaging technology.
- Quickly identify faint calcifications with built-in image enhancement tools on a high-resolution, touch-screen monitor.
- Shorten procedures an average of up to 25% or more¹, which can result in a more positive biopsy experience.
- Automatically separate, identify, and analyze target samples, then transfer seamlessly to pathology with minimal handling to help maintain core integrity.

Breast Imaging Facilities

- Streamline workflow to free up physicians and technicians to perform other important tasks.
- Increase availability of mammography systems to take on additional screenings.
- Lower the cost of handling waste² and simplify inventory management.

Biopsy Patients

- Spend less time under compression, which can result in a more positive patient experience.
- Ensure accurate transfer of samples from radiology to pathology for peace of mind.
